Table of Contents

Overview

The latest update to Orders Gateway includes UI updates and defect corrections. This document provides a brief explanation of what has been fixed and an introduction to new features implemented within this release.

Deployment Date: October 3, 2014

Features and Functionality

This section introduces new features and functionality added to Orders Gateway.

New in This Release

Orders Gateway

- Several new enhancements were added to the Stewart Rate Calculator. For more information, refer to [SRC Enhancements](#).

NPS

Stewart Rate Calculator Enhancements

The following enhancements were added to the Stewart Rate Calculator (SRC) for this release:

- Loan Amount and Sales Amount fields are now disabled when there is no Loan Policy or Owner's Policy selected.

- SRC users now have the ability to configure a maximum quotable Sales Price for a state (similar to what the system does now with Loan Amount). If a user enters a Sales Price that is out of the configurable range for a particular state, the system displays an error.

- Error messaging has been improved. The error message generated when a user enters a Loan Amount that exceeds the configured value, the system will now display a friendly error to notify the user.

Defects

The following items were corrected in Orders Gateway:

- Currently, when an order is rejected and reassigned to a new Search Abstractor, the original abstractor receives a Search Cancelled notification. With this release, the original abstractor will NOT receive a notification that the search was reassigned if the abstractor is configured as an Internal Abstractor.

- The New Search notification sent to the Abstractor is missing some of the short legal elements. This defect has been corrected. All elements of the short legal are now being displayed on the notification.

Additional Information

Training

Visit the OG Training Center at: http://portal.propertyinfo.com/orders-gateway1. This online library consists of recorded webinars and other useful documentation for you to begin or continue to use Orders Gateway.
