

## SureClose – Attach a Document to a Placeholder

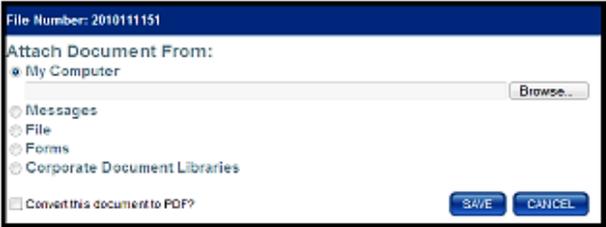

### Attach a Document to a Placeholder

There are several ways to attach a document to a placeholder:

- You can upload the document from your computer
- You can attach an email message as a document from Messages
- You can attach a document from another placeholder within a file
- You can attach a form from your company
- You can attach a form from your corporation's document library

**Steps**

- On the navigation pane, click Files. Recent Files display at the top of the navigation pane.
- From Recent Files, click the file you want to work with. If needed, search for the file.
- With the file selected, click Documents.
- Single-click the placeholder to select it, and then click Attach. The Attach Document From: page displays.

- Select the option that best describes what you want to do:
  - My Computer** – select to attach a document to the placeholder by uploading the document from a location on your computer. Click Browse to locate and select the document.
  - Messages** – select to attach a message as a document to the placeholder.

**Note:** If a document is already attached to the email message then the document is attached to the placeholder (as a document) and the text of the email message is saved as a note  on the placeholder.

- File** – select to attach a document to the placeholder from another placeholder within a file by transferring a copy of the original document to the selected placeholder.

**Note:** When attaching a document from another placeholder within a file, the original document remains on the source file and a copy of the document is attached to the target file.

- Forms** – select to attach a form as a document from your company. The availability of the forms that display in the Available Forms list is determined by the Admin who uploads the form.
- Corporate Document Libraries** – if available, documents can be attached from your corporate document library.

**Note:** Any documents attached from the corporate document library display at the bottom of the Documents page under a new folder indicating they were imported from the corporate document library with a date and time stamp.

- If you want to convert the document to a PDF file, select Convert this document to PDF?
- When finished, click Save. Placeholders with documents attached display with a Paperclip icon  next to their name on the Documents page.

**Note:** Notice there is not a document attached to the Seller Contract placeholder.
