

Updating Stewart RateMate

When you open your RateMate calculator, you will be prompted to upgrade.

When you select YES you will see files downloading and unzipping. You should get success messages that the file was unzipped successfully and that the upgrade is complete. Your RateMate calculator is upgraded and ready to use.

If you receive a message that “there is a new version and to contact Stewart Title” or run into any other technical issues, please contact your sales rep or Regina Morrison (RMorrison@stewart.com – 860-838-4743) for assistance.
