

Fixing Authorization Code Required Error

AIM+ FAQ

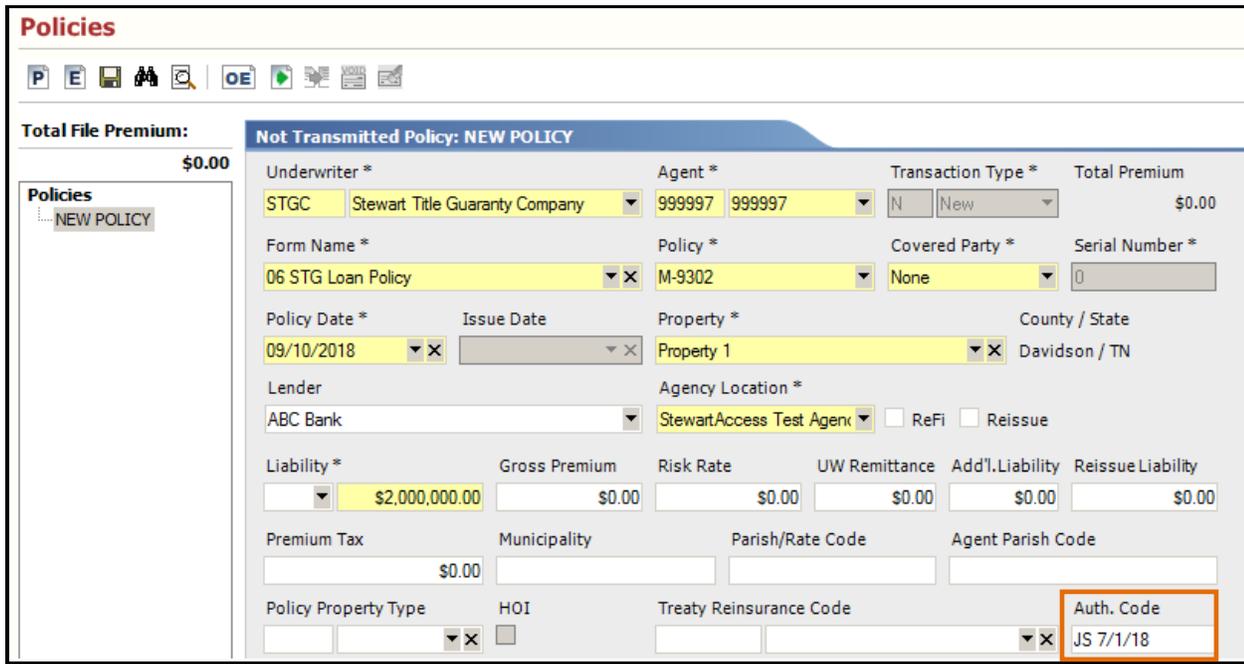

Why am I receiving the message, “Authorization Code is required” when trying to save my policy?

This message indicates that you are attempting to save a policy that has a Liability amount over the approved limit per the underwriter contract.

How do I fix this?

Contact the underwriter to obtain the approval necessary to issue a policy over the contract limit. Once approved, enter the initials of the Underwriter’s representative who approved the amount, along with the date. For example, if John Smith approved the amount on July 1, 2018, then enter JS 7/1/18 as shown below:

Note

Should you have questions about the accuracy of the liability limit or what is stated as such in your underwriter contract, please contact your ASM (if a Stewart underwriter) or your Underwriter Representative (if a non-Stewart underwriter). If the liability amount is not correct in AIM+, please contact the Agency Support Center at (844) 835-1200 or customer care@stewart.com.
