

PLACING ORDERS IS EASIER

WITH STEWART'S FULL ENCOMPASS INTEGRATION.

Stewart knows the importance of making it easier for you to do business with your title partners. That's why we're excited to announce our full integration with Encompass®, which streamlines the process of placing title and escrow orders. Now you can leverage a secure environment to manage your title orders and increase efficiencies with electronic updates directly to the Encompass platform.

Say goodbye to generating and tracking quotes manually; our full integration with Encompass automates the process while providing comprehensive benefits for you and your customer:

- **Request fee quotes and place orders** for purchase or refinance transactions. Orders placed where a referring real estate agent initiated the order will be linked by Stewart.
- **Enjoy the automated import of title-related rates and fees** into the Encompass 2015 itemization form.
- **Select the office you are working with** from Stewart's national network of local offices.
- **Streamline communications** by collaborating with us directly through the system in a secure environment.
- **Receive status updates automatically and make changes to orders directly**, eliminating communication via email or phone.
- **Receive and review documents.**

At Stewart we never stop working to make things easier. Our full integration with Encompass delivers a great experience to you and your customer by streamlining the order-placing process.
