

Stewart Now - New Update!

Stewart Now Web Portal and **Stewart Now Mobile** are getting new enhancements on **June 25, 2020**, to improve user-experience and the application performance. During this update, the system will be unavailable from **9:00 PM June 25, 2020** to **12:00 AM June 26, 2020**.

Stewart Now Portal Enhancements

After the update, you'll notice:

- The search results in the **Orders** tab have been limited to **50** per page, resulting in better performance from the **Web Portal**.
- When a **CTS** order is created, the **Escrow Officer** and **Account Manager/Business Development Officer** will be added to the corresponding **ResWare** file at the time of order creation. **Note:** **Escrow Officers** and **BDOs** will need to be mapped before being added to **ResWare** orders. They will be added to the notes regardless of mappings.
- If a file has been closed or cancelled for more than **90** days, the relevant users will not receive any notifications for that file.

Stewart Now Mobile Enhancements

After the update, you'll notice:

- **Business Development Officers/Account Executives/Admins** now have the option to **Add/Invite User**. With this option, the invitation recipient will receive a notification about Stewart Now and a link to download the app.
- In **Property Profiles**, users now have the option to **Report Data Issues**. With this option, users can report any discrepancies found in the data displayed. The reported discrepancies will be then sent to Support Teams for investigation.
- Various bugs and issues have been fixed.

Note: For **Stewart Now Mobile**, all mentioned enhancements will be made available to use a few days after the update is implemented.
