Hospice Centers

What is a Hospice Center? Hospice is a special kind of care designed to provide comfort and support to patients and their families when a life-limiting illness no longer responds to cure-oriented treatments. Hospice care does neither prolongs life, nor hastens death. Hospice addresses all symptoms of a disease, with special emphasis on controlling a patient's pain and discomfort. The goal of hospice care is to improve the quality of a patient’s last days by providing comfort and dignity.
