General information

Use Form MT-15 to compute the mortgage recording tax due when the mortgaged real property is located in more than one locality, and the localities where the property is located impose tax at different rates. Use this form in the following instances:

- The mortgaged property is located in more than one county, and one or more but not all of the counties are located in the Metropolitan Commuter Transportation District (MCTD). The MCTD includes the counties of New York, Bronx, Kings, Queens, Richmond, Dutchess, Nassau, Orange, Putnam, Rockland, Suffolk, and Westchester.
- The mortgaged property is located in more than one county and the **additional tax** applies in one or more but not all of the counties.
- The mortgaged property is located in more than one locality, and a local mortgage recording tax applies in one or more of the localities. See Schedule C, *Local mortgage recording taxes,* on page 3 for a list of the counties and cities imposing a local tax.
- The mortgaged property is located partially in and partially outside of Yonkers, but entirely in Westchester County.

Form MT-15 provides for an apportionment of the tax based on the relative assessed value of the real property encumbered by the mortgage. The apportioned tax must be paid to the recording officer of the county where the mortgage was first presented for recording.

Both the Tax Department and the recording officer where the mortgage was first recorded and the tax paid will audit Form MT-15. If there is an underpayment of the tax, the Tax Department will instruct the recording officer who collected the tax to notify the parties to the mortgage of the underpayment. If there is an overpayment, the Tax Department will notify the taxpayer.

Alternative to Form MT-15

In lieu of filing Form MT-15, you may compute the mortgage recording tax as if the real property is located entirely in the locality in which the greatest amount of tax is imposed. This amount of tax will be paid to the recording officer of the county where the mortgage is first presented for recording. Also, you should present Form MT-15.1, *Mortgage Recording Tax Claim for Refund,* to the recording officer to claim a refund.

The recording officer will confirm the relative assessed value of the property located in each locality and submit Form MT-15.1 to the Tax Department. The Tax Department will determine the proper total tax due and the amount of tax to be apportioned to each county. If there is an overpayment, the Tax Department will instruct the appropriate recording officer to refund the amount of the overpayment to the taxpayer or to a duly authorized representative.

Specific instructions

Schedule A

Line 1 – Enter the amount of the mortgage, rounding to the nearest hundred dollars. If the value to be rounded is $50 or less, round down. If greater, round up.

Schedule B

Line 4 – If the mortgage is for real property **principally improved or to be improved by a one- or two-family residence or dwelling,** subtract $10,000 from the amount on line 1, and enter the balance on line 4.

Line 6 – If any portion of the mortgaged property is located in the MCTD, list each county and enter the assessed value of the mortgaged property located in that county. Include any mortgaged property that is located in the counties of New York, Bronx, Kings, Queens, Richmond, Dutchess, Nassau, Orange, Putnam, Rockland, Suffolk, and Westchester. Total the assessed values and enter on line 6.

Line 8 – If any portion of the mortgaged property is located in a county outside the MCTD that imposes the additional tax, list each county and enter the assessed value of the mortgaged property located in that county. See *Table 2* on page 4 for a list of counties imposing the additional tax. Also include any mortgaged property that is located in the counties of Albany, Chautauqua, Genesee, Rensselaer, Schenectady, Steuben, Wayne, and Wyoming. Total the assessed values and enter on line 8.

Line 9 – If any portion of the mortgaged property is located in a county that does not impose the additional tax, list each county and enter the assessed value of the mortgaged property located in that county. See *Table 3* on page 4 for a list of counties that do not impose the additional tax. Also include any mortgaged property that is located in the counties of Broome, Columbia, Cortland, Hamilton, Herkimer, Lewis, Schoharie, Sullivan, and Yates. Total the assessed values and enter on line 9.

Schedule C

Lines 16 through 20 – Enter in decimal form the New York City tax rate for the type of mortgage being recorded from the *New York City* column located in *Table 4* on page 4. The decimal equivalents of the rates are $1.00 = .01, $1.125 = .01125, and $1.75 = .0175.

Column A – If the mortgaged property is located in a locality that imposes a separate tax, compute the local tax to be apportioned by multiplying the *Amount of mortgage* on line 1 by the *Tax rate* for the applicable locality. Enter the result in column A.

Column B – Enter on the appropriate line the assessed value of the mortgaged property that is located in each county or city that imposes a separate tax on mortgages.

Note: The assessed value of the mortgaged property that is located in Yonkers must also be included in the assessed value of the mortgaged property that is located in Westchester County.

> **Example:** *A mortgage covers property located in White Plains and Yonkers. The assessed value of the property located in White Plains is $200,000. The assessed value of the property in Yonkers is $300,000. The assessed value entered in column B for line 37, Westchester County, is $500,000. The assessed value entered in column B for line 38, Yonkers, is $300,000.*

Column C – Compute the apportionment factor for each line by dividing the amount in column B, *Assessed value,* by line 10, *Total assessed value.* Carry apportionment factor to at least six decimal places.

Column D – Compute the local tax apportioned for each line by multiplying column A, *Local tax to be apportioned,* by column C, *Apportionment factor.*
