

Environmental/Climate Policy

Stewart Environmental Statement

Stewart is committed to the health and preservation of the global environment.

In all levels of our corporate activity, we at Stewart will make every effort to consider and minimize the impact of our actions on the global environment.

Only by being diligent in every action we take will we be able to be part of the solution for ensuring the future health of this planet we call home.

With that in mind, we will strive to recycle materials and conserve resources and energy in all of our operations on a daily basis.

We will encourage our associates to prioritize environmental preservation and stewardship, understanding that our actions can impact and influence others to take similar steps.

Stewart will strive to be part of the solution in the global fight for the health of the environment and against climate change.
